

QUICK VIS L

Description

QUICK VIS L is an organoclay activator, designed to provide quick yield of organoclay in the oil-based mud. Mainly composed of polyamide material.

Applications

Used when:

- There is limited mixing capacity in the rig equipment
- There is not enough time to allow the organoclay to completely yield
- The base oil contains low aromatics content
- The temperature of the base oil is low
- The base oil has low viscosity and the OWR of the oil-based fluid is high

Features and Benefits

- Enhances the performance of organoclays
- Environmentally friendly
- Saves time when yielding organoclay

Typical Properties

Appearance	Viscous liquid
Color	Amber
Specific Gravity	0.98 – 1.0
Solubility	Soluble in organic solvents, insoluble in water

Recommended Treatment

The recommended treatment for the initial makeup of new fluids is 2 to 4 lb/bbl (6 to 12 l/m³) of QUICK VIS L in invert emulsion systems containing organoclay. For treatments to an existing fluid, 1 to 2 lb/bbl (3 to 6 l/m³) of QUICK VIS L is recommended to increase yield point and gel strength.

Pilot testing is recommended to optimize treatment concentrations.

Safety and Handling

Prior to using this product, refer to the safety data sheet for information on use of personal protective equipment, safe handling, storage, transport, and disposal.

Packaging

QUICK VIS L is available in 55 gal (207 l) drums.
